

Emma's children care centre

P.O. box 462,

Kidatu, Morogoro

Tanzania.

30/1/2009.

My dear Einar and Else Karine, I hope for power of God ~~you~~ you and all your family are continue good, if that we are happy, also ~~if you~~ we are fine, we continue good with our general activities.

Purpose of this letter just to send report - also to say hi! to you all. Lukia and Rahim are continue good, and I send this picture of them where they were living, I took them to test HIV hospital says they are blood is clean, so we thanks for that also, the place where living is very poor, I didn't get a story because no one tell me - the story, but I know they was living with one woman who ~~as~~ a neighbour of them. So she tell me that the parents of them was there for approximately 7 year before they die, also she know some of their relatives around there - but after their parents dead, no one want to take care of Rahim and Lukia, because they says, they are too small, nobody can care them, also they must died because their health are very bad, so that woman because they was - on the ~~same~~ near house, she take them for care, but she says, she was not thinking if one day can come somebody to help this children, so she was thanks very much, but she say, she don't know the story of them and to ask the children are too small, all I don't know their story, but now they continue good, Lukia she was sick, but -

now she can walk properly and try to talk and smile, she was not doing all this, because she was sick.

Also the children who passing exams are continue good with school, about Adolphina I think I should start to find the school, because the school was waiting now looks not very sure, up to now nothing going on.

Also about John Christian, we was there again - with doctor, but the grandmother says, when John parents died there one which doctor was wearing john kind of - rope down of his stomach, that means dont remember their parents, but when he was coming to us, I was telling a grandma that, we dont need anything from which doctor, so she was remove it from him, that's why all this happen. So now he have it again from which doctor nothing happen. So I just listen a doctor good things was telling that grandma but was not possible to believe what doctor says, because - she believe alot from which doctor, so I just live with john there with his grandparents, also he believe alot, he told me after which doctor give him medicine and that rope, nothing happen - to him, but the children up the centre, they are afraid things like that, so I tell grandma, she have to choose, to remove the rope and john to live at the centre, or to keep the rope and to live with john, she was quiet, she tell me she will come to give me answer.

Simba steel like he is, but looks not very painfull. because he is walking around to Ruaha many hours, since morning to lunch, after lunch to night, Also I tell Lucia if she can not come to the centre up to march, nothing will got from us, I think her brother now got a job so if she will not come, he have pay everythings for her. Thanks for today, It's me Emma
