

Kidatu.

30/6/09.

Hello Einar and Else Karine, how are you with your all family, I hope everyone are good.

Purpose of this letter is just to say hi! to you and send site expenses of June, also I, Hilde and all the children we are fine, also we are very happy to have Hilde here for all time she is here. we work together, discussing and also play, so was very nice time to us, the children and I, we are very happy of her, she made very nice things to us, the swing rode and slide makes the centre very different, now the children can play all time they have chance, and also they have many playing with, thank you very much to allow her to made this for us, also we are sad because she is living very soon, the children up and my family we hope she will visit us more times,

Also we was discuss about fance around the children house and we got:

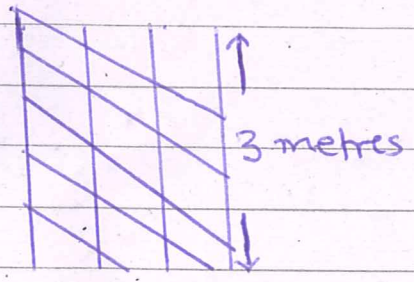

The price of wire fance looks:  this wire coast 1000 Tsh per metre. And around the children house was 220 metres.

1 metre = 3 feet.

So wire was coast 220 metres x 1000 = Tsh 220000/= but it depend how many wire have to past.

Also we was calculate with polls, Hilde have the paper.

But the fance looks coast 15 metres  not is Tsh. 100,000.

So around house is 220 metres

metres 14 Pieces
15 $\sqrt{220 \text{ metres}}$
15
70
60
10

Tsh Pes Tsh.
So 100000 x 14 = 1400000 for fance.

Coast of ~~with~~ polls Hilde have on paper.
Please if you can help us with one of this, we need it.
I+5 me Emma.

Also Norwegian man from Tanesco was
visiting us, brought clothes and shoes for -
the children, I forgot his name but Hilde
will remember his name (I hope).

Thanks very much.

Say Hi! to your all family.
